

Season of Creation 2024

Craft Time

Craft Idea 1

Create a small model, a drawing or a painting of a seed and all the earth's creatures that are needed to make it grow and blossom: water, soil, pollinators, work of human hands, etc. See Season of Creation Celebration Guide 2024 for images.

Craft Idea 2

At the beginning of the season of creation, distribute a bean or seed, (one that easily germinates) to the children of your parish that they can plant in a cup with water or with a cotton ball. Give them clear and simple instructions to help cultivate it.

As this is the time of year for planting bulbs you can alternatively distribute Allium bulbs to plant in a small pot which will grow in spring time. This will teach our children the patience of waiting. The Allium bulb is a biodiversity friendly plant loved by bees.

Craft Idea 3

Create clay sculptures shaped like the hands of people in your community. These sculptures can be shaped all together like in the symbol logo this year, or each hand can be shaped as if it were

Craft Idea 4

Reproduce this year's symbol logo and images related to this year's theme using seeds, beans and other sustainable materials. See examples in the following images that were created by using beans. If you have a child with a nut allergy please be allergy sensitive.
